

## ITALIAN CYPRESS

*Cupressus sempervirens*

Extremely unique because of its very special form, Italian Cypress is an excellent choice for a strong accent around large buildings, in groupings of three to five, planted three feet apart as a tall screen or used to frame your landscape. Whatever the application, Italian Cypress will provide classic distinction in landscape beauty. It is a favorite of all Mediterranean-themed landscapes.

If you desire to draw attention to an area that you would like to be formal in appearance, what better choice would you have than Italian Cypress? With its fine textured genuine rich green foliage, narrow columnar habit and 25'-50' mature height Italian Cypress excels beyond other choices.
